

Dashboard Nodes for Creating UI in Node-RED

Team ID	PNT2022TMID35873
Project Name	Signs with Smart Connectivity for Better Road Safety

The screenshot displays the Node-RED web interface. On the left, the 'filter nodes' sidebar lists various nodes including dropdown, switch, slider, numeric, text input, date picker, colour picker, form, text, gauge, chart, audio out, notification, ui control, template, and linear gauge. The main workspace, titled 'Flow 1', contains a flow starting with an 'IBM IoT' node. This node branches into three paths: one leading to a 'msg.payload' node, another through a 'Temperature' function node to a 'Temperature' chart node, and a third through a 'Humidity' function node to a 'Humidity' gauge node. On the right, the 'dashboard' configuration panel is visible, showing settings for Layout, Site, Theme (indigo), Accents (blue), Warnings (red), Background (grey), and Light / Dark (Light (default)).

Default

Humidity

Temperature
