User Journey Map

Signs with Smart Connectivity for Better Road Safety PNT2022TMID35873

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users. \wp

O Phases High-level steps your user needs to accomplish from start to finish	User must know the Traffic Signs and their Meaning	Proper Management of Vehicles	Implementation of NFC	Driver Monitoring Sensor
② Steps Detailed actions your user has to perform	Knowledge of Traffic Rules	Vehicles must pass the Safety Check Parameters	Faster Easier Communication	GPS and Ultrasonic Sensors to monitor position
Feelings What your user might be thinking and feeling at the moment	Reduces the frequency of accidents	Speed Limits are Detected early in comparison	Flexible Usage	Less Risk of Damage
	Cannot avoid Human Error	Conjusted at Peak Hours	Connectivity interference at high traffic	Service Issues may arise
